

Product Requirements Document

DevKics Global Web Portal

Product Name: DevKics

Tagline: Where Tech Comes to Play

Product Type: Multi-city tournament and community management platform

Platform Owner: Code Campus International

Document Version: 1.0

1. Product Overview

DevKics is a global web platform that enables approved volunteers to organize football tournaments for technology communities in cities around the world.

The platform will operate from one central website while providing dedicated city portals such as:

- devkics.com/abuja
- devkics.com/lagos
- devkics.com/london
- devkics.com/nairobi

Each city portal will contain its own tournaments, organizers, teams, players, fixtures, results, sponsors, volunteers, announcements, media, and historical records.

The central DevKics administration will control the brand, city approvals, user permissions, tournament standards, global content, platform settings, and overall governance.

2. Product Vision

To build the central digital infrastructure for a global, community-led football movement connecting people and organizations within the technology ecosystem.

3. Product Goals

The platform must:

1. Allow visitors to discover DevKics editions worldwide.
 2. Allow volunteers to apply to organize DevKics in their cities.
 3. Allow DevKics administrators to approve and manage city chapters.
 4. Provide each approved city with a dedicated portal.
 5. Allow local organizers to manage tournaments independently.
 6. Allow organizations to register teams.
 7. Allow team managers to register and manage players.
 8. Support fixtures, standings, knockout brackets, results, and statistics.
 9. Support sponsors, volunteers, announcements, media, and event information.
 10. Preserve tournament history across cities and years.
 11. Ensure users can access only the cities and functions assigned to them.
 12. Support future national, continental, and global championships.
-

4. Success Metrics

The product will be considered successful when it achieves measurable growth in:

- Approved city chapters
 - Active city organizers
 - Registered technology organizations
 - Registered teams
 - Registered players
 - Completed tournaments
 - Volunteer applications
 - Sponsor enquiries
 - Website visitors
 - Returning users
 - Match result updates
 - Social media referrals
 - Newsletter subscriptions
 - City application completion rate
 - Team registration completion rate
-

5. Target Users

5.1 Public Visitors

People who visit the website to:

- Learn about DevKics
- Find a city edition
- View tournaments
- View teams and players
- Follow fixtures and results
- Read announcements
- View photographs and videos
- Apply as volunteers
- Apply to organize a city
- Contact DevKics
- Subscribe for updates

5.2 Global Super Administrator

The central platform owner with full access to:

- All cities
- All users
- All tournaments
- All settings
- Global content
- Permissions
- Reports
- Sponsorships
- Applications
- Platform configuration

5.3 Global Operations Administrator

Responsible for:

- Reviewing city applications
- Approving organizers
- Monitoring city activities
- Managing policies
- Reviewing tournament reports
- Supporting local organizers
- Managing global announcements

5.4 Country Administrator

Responsible for overseeing approved DevKics cities within one country.

The role may be introduced when DevKics has multiple active cities in a country.

5.5 City Lead Organizer

Responsible for managing one city chapter and its tournaments.

5.6 City Organizing Team Member

Receives assigned responsibilities such as:

- Team registration
- Fixtures
- Match results
- Volunteers
- Sponsorship
- Media
- Communications
- Logistics

5.7 Organization Representative

Represents a technology company, bootcamp, startup, hub, university, or community.

5.8 Team Manager

Creates and manages a team, invites players, submits the squad, and receives tournament communications.

5.9 Player

Creates a profile, joins a team, confirms participation, and views personal statistics.

5.10 Volunteer

Applies for event support roles and receives assignments.

5.11 Sponsor or Partner

Submits partnership enquiries and may receive access to sponsorship information and approved campaign assets.

6. Product Scope

6.1 In Scope

The first production version will include:

- Global website
- City discovery
- City application system
- City approval workflow
- Multi-city portal architecture
- User registration and authentication
- Role-based access control
- City organizer dashboard
- Organization registration
- Team registration
- Player registration
- Volunteer registration
- Tournament creation
- Group-stage fixtures
- Knockout fixtures
- Match scheduling
- Match result entry
- Standings
- Player statistics
- Team statistics
- Sponsors
- Announcements
- Galleries
- Contact forms
- Notifications
- Reports
- Historical tournament records

6.2 Out of Scope for Initial Release

The following may be introduced later:

- Native Android and iOS applications
- Live video streaming
- Automated video highlights
- Artificial intelligence commentary
- Wearable-device integration
- Ticket sales

- Merchandise sales
 - Online payments in multiple currencies
 - Fantasy football
 - Public discussion forums
 - Direct messaging between users
 - Global player transfer system
 - Advanced referee management
 - Automated identity verification
 - Global team ranking algorithm
-

7. Platform Structure

7.1 Global Website

The main website will use the root domain:

devkicks.com

The global website will contain:

- Homepage
- About DevKicks
- Find a City
- Upcoming Tournaments
- Latest Results
- Apply to Organize
- Volunteer
- Sponsors and Partners
- News
- Media
- Contact
- Login
- Registration

7.2 City Portals

Each city will have a dedicated URL:

devkicks.com/{city}

Examples:

- devkics.com/abuja
- devkics.com/lagos
- devkics.com/london

Each city portal must contain:

- City homepage
- About the city edition
- Organizing team
- Current tournament
- Upcoming tournaments
- Teams
- Players
- Fixtures
- Results
- Standings
- Knockout bracket
- Statistics
- Sponsors
- Volunteers
- Announcements
- Gallery
- Previous champions
- Contact information

7.3 Tournament URLs

Each tournament should have a unique URL under the city portal.

Example:

devkics.com/lagos/tournaments/2027

A future edition may use:

devkics.com/lagos/tournaments/2028

8. Core User Journeys

8.1 Apply to Organize a City

1. Visitor selects **Bring DevKics to Your City**.

2. Applicant creates an account.
3. Applicant completes the city organizer application.
4. Applicant provides:
 - Full name
 - Email
 - Phone number
 - City
 - Country
 - Technology community experience
 - Event organization experience
 - Proposed organizing team
 - Expected participating organizations
 - Proposed venue
 - Proposed tournament period
 - Motivation
5. Applicant submits the application.
6. Global administrator reviews it.
7. Administrator may request additional information.
8. Application is approved or rejected.
9. Approved applicant accepts the organizer agreement.
10. The city portal is created.
11. The applicant becomes the City Lead Organizer.
12. The organizer completes onboarding.

8.2 Register an Organization

1. Organization representative creates an account.
2. Representative selects a city tournament.
3. Representative registers the organization.
4. City organizer reviews the organization.
5. Organization is approved or rejected.
6. Approved organization can create a team.

8.3 Register a Team

1. Approved organization representative creates a team.
2. Representative enters:
 - Team name
 - Organization
 - Team logo
 - Team colours
 - Team manager
 - Short description
3. Team manager invites players.

4. Players complete their profiles.
5. Team manager submits the final squad.
6. City organizer approves the squad.
7. Approved team becomes visible publicly.

8.4 Register as a Player

1. Player receives an invitation or selects a team.
2. Player creates an account.
3. Player provides:
 - Full name
 - Photograph
 - Date of birth
 - Gender
 - Position
 - Jersey number
 - Organization
 - City
 - Emergency contact
 - Medical declaration
4. Player accepts the code of conduct and participation waiver.
5. Team manager confirms the player.
6. City organizer approves the player where required.

8.5 Create and Run a Tournament

1. City Lead Organizer creates a tournament.
2. Organizer enters:
 - Tournament name
 - Year
 - Date
 - Venue
 - Registration deadline
 - Maximum number of teams
 - Match format
 - Group structure
 - Match duration
 - Tournament rules
3. Organizer approves participating teams.
4. Platform generates groups and fixtures.
5. Organizer reviews and publishes fixtures.
6. Match officials or authorized organizers update results.
7. Standings update automatically.
8. Qualified teams advance to knockout rounds.

9. Final results and awards are published.
 10. Tournament is archived after completion.
-

9. Functional Requirements

9.1 Authentication and Account Management

The system must allow users to:

- Register with email and password
- Log in securely
- Log out
- Reset forgotten passwords
- Verify email addresses
- Update account information
- Change passwords
- Upload profile photographs
- Deactivate accounts
- Accept platform policies
- View assigned roles
- View assigned cities

Optional future authentication methods:

- Google login
 - Apple login
 - Microsoft login
 - LinkedIn login
-

9.2 Role-Based Access Control

The system must restrict access according to user role.

Users may have more than one role.

For example, a user may be:

- A player in Abuja
- A volunteer in Lagos
- A city organizer in Kaduna

Permissions must be restricted by:

- Role
- City
- Country
- Tournament
- Organization
- Team

A Lagos organizer must not be able to edit Abuja data.

A team manager must not be able to edit another team.

A player must not be able to change official match statistics.

9.3 City Management

Global administrators must be able to:

- Create a city
- Approve a city
- Suspend a city
- Archive a city
- Assign a City Lead Organizer
- Replace a City Lead Organizer
- Add organizing team members
- Configure the city URL
- Upload a city banner
- Add city information
- Add contact details
- View city reports
- Review city activity
- Publish or unpublish a city portal

City organizers must be able to:

- Edit approved city information
- Add organizing team members
- Manage local content
- Create tournaments
- Manage local sponsors
- Manage local volunteers
- Publish announcements

9.4 City Organizer Applications

The system must provide:

- Online application form
- Draft saving
- File uploads
- Application status tracking
- Administrator review notes
- Request-for-information workflow
- Approval
- Rejection
- Suspension
- Organizer agreement acceptance
- Automated email notifications

Application statuses:

- Draft
- Submitted
- Under Review
- More Information Required
- Approved
- Rejected
- Suspended
- Withdrawn

9.5 Tournament Management

Authorized organizers must be able to:

- Create tournaments
- Save tournaments as drafts
- Publish tournaments
- Edit tournament information
- Set registration dates
- Set participant limits
- Define tournament format
- Define match duration
- Define team size

- Define substitution rules
- Upload tournament rules
- Add venues
- Add pitches
- Add officials
- Add sponsors
- Close registration
- Postpone a tournament
- Cancel a tournament
- Archive a tournament

Tournament statuses:

- Draft
 - Registration Open
 - Registration Closed
 - Fixtures Published
 - Ongoing
 - Completed
 - Postponed
 - Cancelled
 - Archived
-

9.6 Organization Management

The platform must support organizations such as:

- Technology companies
- Startups
- Bootcamps
- Innovation hubs
- Universities
- Developer communities
- Nonprofit organizations
- Government technology units
- Corporate technology departments

Organization profiles must include:

- Name
- Logo
- Description
- Website

- Industry
 - City
 - Country
 - Contact person
 - Contact email
 - Contact number
 - Social media links
 - Verification status
 - Participating teams
 - Tournament history
-

9.7 Team Management

Team managers must be able to:

- Create teams
- Edit team information
- Upload team logo
- Select team colours
- Invite players
- Remove players before squad approval
- Assign captain
- Assign vice-captain
- Assign coach
- Assign goalkeeper
- Select jersey numbers
- Submit final squad
- View approval status
- View fixtures
- View team statistics
- Download team information

City organizers must be able to:

- Approve teams
- Reject teams
- Request changes
- Suspend teams
- Disqualify teams
- Lock squad changes
- Reopen squad registration

9.8 Player Management

Player profiles must contain:

- Full name
- Profile photograph
- City
- Country
- Organization
- Team
- Position
- Jersey number
- Player status
- Tournament history
- Appearances
- Goals
- Assists
- Yellow cards
- Red cards
- Clean sheets, where applicable
- Awards

Sensitive information such as medical declarations and emergency contacts must not be publicly displayed.

Player statuses:

- Invited
- Registration Incomplete
- Pending Approval
- Approved
- Suspended
- Withdrawn
- Disqualified

9.9 Fixtures and Scheduling

The platform must support:

- Manual fixture creation

- Automatic fixture generation
- Group-stage scheduling
- Round-robin scheduling
- Knockout scheduling
- Semi-finals
- Third-place playoff
- Final
- Multiple pitches
- Match time allocation
- Rest-period rules
- Fixture conflict warnings
- Fixture editing
- Fixture publication
- Fixture postponement
- Fixture cancellation

Each fixture must contain:

- Tournament
- Stage
- Group
- Home team
- Away team
- Date
- Start time
- Venue
- Pitch
- Match official
- Match status
- Score
- Match events

9.10 Live Results and Match Centre

Authorized users must be able to update:

- Match start
- Goals
- Goal scorers
- Assists
- Yellow cards
- Red cards

- Substitutions
- Half-time score
- Full-time score
- Extra time
- Penalty shootout
- Match completion
- Match notes

Public users should be able to see:

- Current score
- Match status
- Goal events
- Cards
- Line-ups, where available
- Match timeline
- Venue
- Scheduled time
- Final result

Match statuses:

- Scheduled
- Delayed
- Live
- Half Time
- Full Time
- Extra Time
- Penalties
- Postponed
- Cancelled
- Abandoned

9.11 Standings

The platform must automatically calculate:

- Matches played
- Wins
- Draws
- Losses
- Goals scored
- Goals conceded

- Goal difference
- Points
- Position

The system must support configurable tie-breakers such as:

1. Points
2. Goal difference
3. Goals scored
4. Head-to-head result
5. Fair play record
6. Playoff or drawing of lots

Organizers must be able to correct standings manually with an audit record.

9.12 Knockout Brackets

The platform must:

- Display knockout rounds visually
 - Automatically advance winning teams
 - Support penalty shootouts
 - Support third-place matches
 - Support manual corrections
 - Clearly show the tournament champion
-

9.13 Statistics

The platform must calculate:

Player Statistics

- Appearances
- Starts
- Goals
- Assists
- Yellow cards
- Red cards
- Clean sheets
- Player of the Match awards

Team Statistics

- Matches played
- Wins
- Draws
- Losses
- Goals scored
- Goals conceded
- Clean sheets
- Cards
- Tournament finishes

Tournament Leaderboards

- Top scorers
- Top assists
- Best goalkeepers
- Most disciplined teams
- Most valuable players

City Statistics

- Total tournaments
 - Total teams
 - Total players
 - Total matches
 - Total goals
 - Previous champions
-

9.14 Awards Management

Organizers must be able to create and assign awards such as:

- Tournament Champion
- Runner-up
- Third Place
- Most Valuable Player
- Golden Boot
- Best Goalkeeper
- Best Defender
- Best Young Player
- Fair Play Award

- Fans' Player of the Tournament
- Best Team Branding

Awards must appear on:

- Tournament pages
 - Player profiles
 - Team profiles
 - City history pages
-

9.15 Volunteer Management

Visitors must be able to apply for volunteer roles such as:

- Event registration
- Match operations
- Media
- Photography
- Videography
- Social media
- Logistics
- Medical support
- Hospitality
- Sponsorship
- Team liaison
- Refereeing
- Commentary

Organizers must be able to:

- Create volunteer roles
 - Set required numbers
 - Review applications
 - Approve volunteers
 - Reject volunteers
 - Assign responsibilities
 - Send instructions
 - Record attendance
 - Download volunteer lists
-

9.16 Sponsor Management

Global and city administrators must be able to:

- Create sponsor profiles
- Upload sponsor logos
- Add sponsor descriptions
- Assign sponsorship levels
- Set sponsorship duration
- Link sponsors to tournaments
- Link sponsors to cities
- Display sponsor websites
- Reorder sponsor visibility
- Publish and unpublish sponsors

Sponsor categories may include:

- Title Sponsor
- Platinum Sponsor
- Gold Sponsor
- Silver Sponsor
- Technology Partner
- Connectivity Partner
- Media Partner
- Medical Partner
- Hydration Partner
- Venue Partner
- Awards Partner

The platform must include a sponsorship enquiry form.

9.17 Content and Announcements

Authorized administrators must be able to publish:

- Global news
- City announcements
- Tournament updates
- Match reports
- Team announcements
- Sponsor announcements
- Registration notices

- Venue updates
- Post-event reports

Content must support:

- Headline
 - Featured image
 - Body content
 - Author
 - Publication date
 - City
 - Tournament
 - Categories
 - Search-engine metadata
 - Draft and published statuses
-

9.18 Media Gallery

The platform must support:

- Photographs
- Videos
- Albums
- Event galleries
- Team galleries
- Match galleries
- Award galleries
- Sponsor galleries

Administrators must be able to:

- Upload media
 - Add captions
 - Add credits
 - Select cover images
 - Assign content to a city
 - Assign content to a tournament
 - Publish or unpublish media
 - Remove inappropriate media
-

9.19 Notifications

The platform should send notifications for:

- Account verification
- Password reset
- City application submission
- City application approval
- City application rejection
- Team invitation
- Player invitation
- Team approval
- Team rejection
- Player approval
- Fixture publication
- Fixture change
- Registration deadline
- Match reminder
- Volunteer approval
- Organizer announcements
- Tournament postponement
- Tournament cancellation

Initial notification channels:

- Email
- In-platform notifications

Future channels:

- SMS
 - WhatsApp
 - Push notifications
-

9.20 Search and Discovery

Visitors must be able to search for:

- Cities
- Countries
- Tournaments
- Organizations

- Teams
- Players
- News
- Sponsors

Filters should include:

- Country
 - City
 - Tournament year
 - Tournament status
 - Organization type
 - Team
 - Player position
-

9.21 Global and City Dashboards

Global Dashboard

Must show:

- Total cities
- Active cities
- Pending city applications
- Total tournaments
- Total organizations
- Total teams
- Total players
- Total volunteers
- Upcoming tournaments
- Recent results
- Platform activity
- Registration trends

City Organizer Dashboard

Must show:

- Current tournament
- Registration status
- Approved teams
- Pending teams

- Approved players
- Pending players
- Upcoming matches
- Unpublished results
- Volunteer applications
- Sponsor enquiries
- Recent announcements
- Required organizer actions

Team Manager Dashboard

Must show:

- Team status
- Player invitations
- Approved players
- Incomplete registrations
- Fixtures
- Results
- Team statistics
- Announcements
- Registration deadlines

Player Dashboard

Must show:

- Player profile
- Team
- Approval status
- Fixtures
- Results
- Statistics
- Awards
- Notifications

10. Administrative Audit Trail

The platform must record important administrative actions, including:

- User role changes
- City approval

- City suspension
- Team approval
- Player approval
- Fixture changes
- Result changes
- Standings corrections
- User suspension
- Tournament cancellation
- Content deletion

Each record should include:

- User who performed the action
 - Action performed
 - Date and time
 - Previous value
 - New value
 - Reason, where required
-

11. Data Model

The core system entities will include:

- User
- Role
- Permission
- Country
- City
- City Application
- City Organizer
- Organization
- Tournament
- Venue
- Pitch
- Team
- Team Manager
- Player
- Squad
- Fixture
- Match
- Match Event
- Group

- Standing
 - Knockout Round
 - Award
 - Volunteer
 - Volunteer Application
 - Sponsor
 - Sponsorship
 - Announcement
 - News Article
 - Gallery
 - Media File
 - Notification
 - Contact Enquiry
 - Audit Log
-

12. Non-Functional Requirements

12.1 Responsiveness

The portal must work effectively on:

- Mobile phones
- Tablets
- Laptops
- Desktop computers

Mobile usability is a priority because many organizers, players, and spectators will access the portal during tournaments.

12.2 Performance

The platform should:

- Load core pages quickly
- Optimize photographs automatically
- Use caching
- Support concurrent match-day traffic
- Update live results without full page reloads
- Minimize unnecessary data usage

12.3 Scalability

The architecture must support:

- Hundreds of cities
- Thousands of tournaments
- Tens of thousands of teams
- Hundreds of thousands of players
- High traffic during major tournaments
- Multiple countries and time zones

12.4 Availability

The production platform should target at least 99.5% uptime.

12.5 Accessibility

The platform should follow recognized accessibility principles, including:

- Keyboard navigation
- Readable colour contrast
- Alternative text for images
- Clearly labelled forms
- Accessible error messages
- Screen-reader compatibility

12.6 Internationalization

The initial language will be English.

The architecture should support future translations and:

- Multiple currencies
- Multiple date formats
- Multiple time zones
- Country-specific phone formats
- Local tournament terminology

13. Security and Privacy

The platform must include:

- Secure password storage
- Email verification
- Role-based authorization

- Protection against unauthorized city access
- Secure file uploads
- Rate limiting
- Form spam protection
- Session expiration
- Audit logs
- Data backups
- Encryption in transit
- Administrative login protection
- Optional two-factor authentication for administrators

The platform must protect:

- Date of birth
- Emergency contact information
- Medical information
- Private phone numbers
- Organizer application information
- Internal administrative notes

Public player profiles should display only approved information.

14. Legal and Consent Requirements

Users must accept relevant documents before participation, including:

- Terms of Use
- Privacy Policy
- Code of Conduct
- Player Participation Waiver
- Media Consent
- Volunteer Agreement
- City Organizer Agreement
- Brand Usage Policy
- Tournament Rules

Parental or guardian consent must be required if future youth tournaments permit minors.

15. Reporting Requirements

Global administrators must be able to generate reports by:

- City
- Country
- Tournament
- Organization
- Team
- Player
- Volunteer
- Sponsor
- Date range

Reports should be downloadable in:

- CSV
- Excel
- PDF

Key reports include:

- City performance report
 - Tournament participation report
 - Team registration report
 - Player registration report
 - Volunteer report
 - Match results report
 - Sponsor report
 - Platform growth report
 - User activity report
-

16. Search Engine and Social Sharing Requirements

Public pages should support:

- Search-friendly page titles
- Meta descriptions
- Clean URLs
- Social sharing images
- Structured tournament information
- City-specific search visibility
- Team and player page indexing controls
- Sitemap generation
- Canonical URLs

- Open Graph metadata

Example page title:

DevKics Lagos 2027 | Technology Community Football Tournament

17. Minimum Viable Product

The first release should prioritize the features required to successfully run one pilot tournament and prepare the platform for additional cities.

MVP Features

- Global homepage
- City pages
- User registration and login
- City organizer application
- City approval
- Role-based permissions
- Tournament creation
- Organization registration
- Team registration
- Player registration
- Team approval
- Player approval
- Fixture creation
- Match scheduling
- Result entry
- Automatic standings
- Knockout bracket
- Basic player statistics
- Basic team statistics
- Announcements
- Sponsor display
- Volunteer application
- Email notifications
- Administrator dashboard
- City organizer dashboard
- Mobile-responsive design
- Basic reporting
- Audit logging

18. Post-MVP Features

After the pilot has been completed successfully, the following may be introduced:

- Automated fixture generation
- Live match timeline
- Fan voting
- Match predictions
- Player of the Match voting
- Public global rankings
- Country administration
- Advanced sponsor dashboards
- QR-code player check-in
- QR-code volunteer check-in
- Digital player cards
- SMS notifications
- WhatsApp notifications
- Payment processing
- Ticketing
- Merchandise
- Livestream integration
- Artificial intelligence highlights
- Native mobile applications
- National championships
- Continental championships
- Global Cup management

19. Recommended Delivery Phases

Phase 1: Foundation

- Brand website
- Authentication
- Roles and permissions
- City management
- Organizer applications
- Basic dashboards

Phase 2: Tournament Operations

- Organizations
- Teams
- Players
- Tournament creation
- Fixtures
- Results
- Standings
- Knockout brackets

Phase 3: Community and Content

- Volunteers
- Sponsors
- Announcements
- News
- Media galleries
- Notifications

Phase 4: Scale and Automation

- Automated fixtures
- Advanced statistics
- Global reports
- Country administration
- Multiple languages
- Improved match-day tools

Phase 5: Global Competition

- National championships
 - Regional championships
 - Continental championships
 - Global rankings
 - DevKics Global Cup
-

20. MVP Acceptance Criteria

The MVP will be ready for launch when:

1. A global administrator can create and approve a city.
2. An approved organizer can access only the assigned city.
3. The organizer can create and publish a tournament.

4. Organizations can register for the tournament.
 5. Team managers can create teams and invite players.
 6. Players can complete and submit their profiles.
 7. Organizers can approve teams and players.
 8. Organizers can create and publish fixtures.
 9. Authorized users can enter match results.
 10. Group standings update automatically.
 11. Teams can advance into knockout rounds.
 12. Public users can view fixtures, scores, standings, teams, and players.
 13. Sponsors can be displayed on global, city, and tournament pages.
 14. Volunteer applications can be submitted and reviewed.
 15. Users receive essential email notifications.
 16. The portal works properly on mobile and desktop.
 17. Sensitive player information is protected.
 18. Administrative changes are recorded in the audit log.
 19. Completed tournaments can be archived without losing their records.
 20. A second city can be added without building a separate website.
-

21. Product Assumptions

This PRD assumes that:

- DevKics will begin with football.
 - Most initial tournaments will use five-a-side or six-a-side formats.
 - The first pilot will likely be organized in Abuja.
 - English will be the initial platform language.
 - Team payments and ticket sales will not be required in the first release.
 - Results will initially be entered by approved organizers or match officials.
 - Code Campus International will control the global platform.
 - City organizers will operate under a central licence, agreement, and code of conduct.
 - Each city may organize multiple tournaments over time.
 - Historical records must remain available after each tournament ends.
-

22. Product Summary

The DevKics web portal will serve as the central operational and digital infrastructure for a global network of technology-community football tournaments.

The platform must balance two requirements:

1. Give city organizers enough independence to run successful local editions.
2. Give the global DevKics administration enough control to protect the brand, quality, data, governance, and long-term direction of the movement.

The first version should focus on successfully managing the full lifecycle of a city tournament, from organizer approval and team registration to fixtures, results, standings, awards, reporting, and historical archiving.

DevKics — Where Tech Comes to Play.
